

Table of Contents

1. Executive Summary – <i>A summary of the major findings and themes</i>	6
2. Introduction – <i>Describes the purpose and content</i>	9
3. Methods – <i>Identifies and describes the data sources, methods of analysis used and a summary of limitations</i>	11
4. Demographics – <i>Describes the population characteristics of Huron County such as population size, density, age distribution, ethnicity and immigration</i>	14
5. Social Determinants of Health – <i>Explains the impact of social and economic factors on health and describes the social and economic characteristics of Huron County</i>	16
<i>Income and Cost of Living in Huron County</i>	
<i>Employment</i>	
<i>Education</i>	
<i>Housing</i>	
<i>Food Security</i>	
<i>Social Networks</i>	
6. Self-Reported Health – <i>Describes self-reported general health status of Huron County residents by various social and economic factors, such as income level and education</i>	21
7. Behavioural Risk Factors – <i>Measures and describes various health behaviours established to increase the risk of developing poor health outcomes, particularly chronic health conditions</i>	23
<i>Tobacco</i>	
<i>Smoking Status</i>	
<i>Smoke-Free Homes</i>	
<i>Secondhand Smoke</i>	
<i>Alcohol</i>	
<i>Alcohol Use</i>	
<i>Binge Drinking</i>	
<i>Drinking and Driving</i>	
<i>Physical Activity</i>	
<i>Fruit and Vegetable Consumption</i>	
<i>Body Mass Index (BMI)</i>	
<i>Sun Safety</i>	
<i>Self-Perceived Life Stress</i>	
8. Mortality – <i>Describes annual deaths rates in Huron County and ranks the leading causes of death and premature mortality</i>	30
<i>All Cause Mortality</i>	
<i>Leading Causes of Death</i>	
<i>Standardized Mortality Ratios (SMRs)</i>	
<i>Life Expectancy</i>	
<i>Potential Years Life Lost (PYLL)</i>	

9. Morbidity – Describes annual hospitalization rates in Huron County and ranks the leading causes of hospitalization.	39
All Cause Hospitalization	
Leading Causes of Hospitalization	
Standardized Morbidity Ratios (SMRs)	
10. Chronic Health Conditions – Measures the self-reported prevalence of health conditions which develop and last over a long period of time and also describes hospitalization and death rates for chronic conditions of public health importance.	49
Prevalence of Chronic Health Conditions	
Morbidity and Mortality for Selected Chronic Conditions	
Ischemic Heart Disease	
Cerebrovascular Disease	
Diabetes	
Chronic Lower Respiratory Diseases	
Incidence and Mortality Rates for Cancers	
Overall Cancer Incidence and Mortality	
Breast Cancer	
Prostate Cancer	
Colorectal Cancer	
Lung Cancer	
Prevalence of Cancer Screening	
Breast Cancer	
Cervical Cancer	
Colorectal Cancer	
11. Reproductive Health – Describes the characteristics of Huron County parents which are known to affect birth outcomes and measures the number and rate of births and pregnancies in Huron County. Birth outcomes are also described and compared to the province.	71
Characteristics and Health Behaviours in Parents	
Maternal and Paternal Age	
Maternal Education	
Household Income	
Level of Support in the Household	
Smoking Status	
Alcohol Use	
Folic Acid Supplementation	
Prenatal Classes	
Breastfeeding Initiation and Duration	
Fertility and Pregnancy	
Crude Birth Rate	
Multiple Births	
Pregnancy Rate	
Fertility Rate	
Therapeutic Abortion Rate	
Birth Outcomes	
Birth Weight	
Low Birth Weight Rate	
High Birth Weight Rate	
Preterm Birth rate	
Stillbirth Rate	

Infant Mortality Rate
Congenital Anomalies

12. Unintentional Injury and Injury Prevention – *Describes important risk factors for unintentional injuries with a focus on risk factors prevalent in rural environments. Emergency room visits, hospitalizations and deaths are measured to describe select unintentional injuries. Self-reported injury prevention behaviours are described.* 79

- Risk Factors for Unintentional Injuries*
- Self-Report Injury*
- All Unintentional Injuries (All Causes)*
- Selected Causes of Injury*
 - Falls*
 - Land Transport Occurrences*
 - Injuries Occurring on Farms*
- Unintentional Injuries in Children 0-6 years*
- Injury Prevention*
 - Seat Belt and Booster or Car Seat Use*
 - Bike Helmet use*

13. Communicable Disease – *Measures and describes the most common reportable diseases in Huron County caused by infectious bacteria, viruses and parasites.* 88

- Most Common Reportable Diseases*
- Sexually Transmitted Infections (STIs) and Bloodborne Diseases*
 - Chlamydia*
 - Gonorrhea*
 - Hepatitis C*
- Food and Waterborne Enteric Diseases*
 - Campylobacteriosis*
 - Salmonellosis*
 - Giardiasis*
 - Verotoxin-Producing Escherichia coli (VTEC)*
 - Cryptosporidiosis*
- Vaccine Preventable Diseases*
 - Influenza*
 - Pertussis*
 - Rubella*
- Zoonotic Diseases*
 - Rabies*
 - West Nile Virus*
- Outbreaks*

14. Environmental Health – *Describes the unique aspects of the rural physical environment that impact the health of Huron County residents.* 105

- Water in Huron County*
- Rurality*
 - Private Drinking Water Wells*
 - Private Septic Systems*
 - Population Density and the Built Environment*

15. Oral Health – *Measures self-reported dental health status of Huron County residents by social and economic factors and describes health behaviours established to influence oral health. 112*

- Self-Perceived Oral Health*
- Regular Dental Check-ups*
- Dental Insurance*
- Teeth Brushing*
- Oral Health of Children in Huron County*

16. Discussion of Themes – *Summarizes major themes which emerged from the report as identified by health unit staff. The themes are labelled as important determinants of health for Huron County residents and their impact is briefly described. 116*

Appendices
